Open Workshop dedicated to PEMFC bipolar plate innovations : from manufacturing to real field testing

December 13th 2017 at CEA Grenoble, France

Registration is free but inscription is necessary*

Inscription deadlines :

For non-EU people : November 10th

For EU people : December 1st

Please contact : fabrice.micoud@cea.fr for registration and more information

** : a copy of your passport/ID card will be required for inscription to grant you access to CEA facilities.*

The COBRA project, funded by FCH-JU and gathering European industrials and scientists, has been initiated to study **new manufacturing methods and coating concepts for metal bipolar plates** and demonstrate their interest for Fuel cell systems in real life conditions.
